MTP Trunks, Harnesses, and Jumpers are part of a fiber optic tip-to-tip solution for Data Centers, Storage Area Networks (SANs), some Carrier applications or any other scenario utilizing an MTP-based fiber optic cabling system. These products are high-density preterminated optical cabling solutions that simplify installation and improve performance in the environment. Corning® ClearCurve® bend-optimized optical fiber is the core element ensuring reliability when designing custom-engineered components thanks to its significant reduction in macrobend loss even in the most challenging bend scenarios. Corning factory-terminated MTP Trunks, Harnesses, and Jumpers provide improved system performance, ensure component compatibility, and yield consistent high quality.
